Summary

I like to create useful tools and intuitive frontend design's. I have completed some projects most of them personal projects and self motivated. Hosted on my GitHub page. I have also created my personal portfolio website which is under progress, little more left to complete.

My hobbies include Coding new UI's, reading moral books, last book I read was 'Birthday girl' by author Murakami. Current project I'm working on is called SaveBill. Its code is uploaded to git. Last commit was yesterday 11:20pm.

I love to work with visionary team members towards the goal. Visit my git page to see my works:
